Hiring Committee
Tufts Career Center
Tufts University
Medford, MA

Dear Hiring Committee,

I am writing to apply for the Data Analyst position with the Tufts Career Center. I am currently pursuing a Master's degree in Statistics at the University of Massachusetts Amherst, and I am excited by the opportunity to support a student-centered office that uses data to improve services, evaluate engagement, and inform decision-making. Tufts' emphasis on helping students and alumni prepare for meaningful career opportunities strongly appeals to me.

My academic and research background has prepared me well for a role centered on data management, quantitative analysis, and communication of results. Through graduate training in statistics and earlier study in applied statistics, I have built strong foundations in statistical analysis, data cleaning, research design, and interpretation of quantitative findings. I have used Python, R, SQL, SAS, SPSS, and Stata in coursework and research settings. My research experience at the University of Dhaka included interdisciplinary and applied projects, including work related to language modeling and poverty and inequality mapping, where careful data handling and analytical thinking were essential.

In addition, my current role as a Teaching Assistant in the Department of Mathematics and Statistics at UMass Amherst has strengthened my ability to explain technical concepts clearly, stay organized, and work effectively in an academic environment. I am especially interested in helping track student and alumni engagement, identify meaningful patterns in service usage, and provide accurate reporting that supports planning and assessment within the Career Center.

I am drawn to this role because it combines analytical work with the mission of supporting students in higher education. I would be glad to bring a strong quantitative background, attention to detail, and a collaborative approach to Tufts University. Thank you for your time and consideration. I would welcome the opportunity to discuss my background further.

Sincerely,

Mst Afsana Mimi
